AMS Go at a glance

Occupational safety software for companies of every size

AMS Go combines smart software modules with hands-on expertise to keep occupational safety alive in manufacturing, logistics and administration – from mobile data capture to AI-powered analysis.

Hosted in Germany | GDPR-compliant | Web app and mobile app | Support from real people

MODULES

Risk assessments
Digital, structured, with AI

Operating instructions
Central, versioned, easy to find

Safety inspections
Mobile, structured, traceable

Action plan
All actions under control

Inspection register
Inspection deadlines and records under control

Training matrix
Plan and document safety briefings

Visitor management
Check in, check out, GDPR-compliant

Hazardous substances
SDS, AI extraction, approvals

OHS committee minutes
Document committee meetings easily

Folder management
File documents in a structured way

Incident management
Record accidents, derive actions

Fire safety
Organise briefings and inspections

SOFTWARE

Web app
The complete platform in your browser

Mobile app
Inspect and document on site

AI features
Hazards, data sheets, instructions

Integration
SSO, API and on-premise

From safety data sheet to operating instructions in 2 minutes

Drop the data sheet, the AI does the rest: read hazardous substance data, fill the register, derive operating instructions.

INTEGRATION

SSO / Active Directory
Connect your existing sign-in

API access
Full data access via REST API

Document migration
Take over existing documents for a smooth start

Optional
On-premise hosting, your own database or storage (Azure Storage, AWS S3, SharePoint)

SMES AND HIDDEN CHAMPIONS TRUST AMS GO

For example Schake (metalworking), KNIPPING (automotive) and Fernholz (food industry) – read the case studies on amsgo.de.

SECURITY & DATA PROTECTION

Hosting in Germany
Runs at IONOS in data centers in Germany. The managed database is ISO 27001 certified.

Encrypted throughout
All connections via TLS, stored data protected with modern encryption standards.

GDPR & EU company
AMS Go GmbH is based in Karlsruhe, Germany, and processes data in accordance with the GDPR.

Access under control
Central user management and single sign-on, for example with Microsoft Entra ID or Keycloak.

Traceable documentation
Changes are versioned – an audit-proof basis for audits and authorities.

Your data belongs to you
Export at any time via REST API, versions and PDFs available for download. Visitor data is deleted automatically after a defined period.

Data processing agreement (Art. 28 GDPR), technical and organizational measures (Art. 32 GDPR) and the list of subprocessors are available on request.

HOW AN AMS GO ROLLOUT WORKS

1

Kick-off & assessment
Together we look at your processes, sites and existing documents and decide where you start.

2

Data migration
We take over existing risk assessments, hazardous substances, operating instructions, users and trainings during onboarding.

3

Everyday start
After a short introduction you get going right away – in the web app and with the mobile app on the shop floor.

4

Expand step by step
More areas, sites and modules are added when you are ready – without switching systems and without dead weight.

PRICING

Plan	Scope	Promo price 2026	Regular
Enterprise	up to 250 employees per site	**€499 / month**	€1,000 / month
Custom	Large enterprises	on request	

Prices per site. The promotional price applies to everyone who signs up in 2026, for the first 2 years. Email and phone support in both plans. All features per plan: amsgo.de/en/pricing

Let's talk

In a personal demo, we show you AMS Go with examples from your industry.
